

NH Acupuncture & Asian Medicine Association

A Voice for Asian Medicine in the Granite State

28 August 2017

Greetings:

This is in regards to **HR 2838**, The Acupuncture for Our Heroes Act.

One of the missions of the NHAAMA is to promote and assist activities that nurture the health of our community, our nation and the world. We believe that all people can benefit from regular acupuncture treatments. Acupuncture has been reducing people's reliance on prescription drugs and surgery and is thus a cost savings to any system that includes it. Inclusion of acupuncture at the Veteran's Administration will reduce the burden on other parts of an overworked system and reduce the already long waiting lists.

We support HR 2838, The Acupuncture for Our Heroes Act. We see this as an opportunity to provide the power to heal to an underserved segment of the population and help reduce the workload on the current infrastructure.

Warm regards,

Paul Mosier, MAOM, L.Ac, CCH
President, New Hampshire Acupuncture & Asian Medicine Association
